

19th International Workshop On Laser Ranging
Interactive Session 1: ILRS Station site/history log review

R. Ricklefs, Julie Horvath

31 October 2014

1) Three methods of tracking station changes:

a) CRD Configuration Records

http://ilrs.gsfc.nasa.gov/docs/2009/crd_v1.01.pdf

b) Site Log

<ftp://cddis.gsfc.nasa.gov/reports/slrlog>

c) Change History Log

[/ftp://cddis.gsfc.nasa.gov/slr/slrlog/slrhst/](ftp://cddis.gsfc.nasa.gov/slr/slrlog/slrhst/)

2) Make the updates as soon as possible as the change has been made. CRD configuration records should be made before new data is sent.

3) For the site and change history logs, please retrieve your existing files from the ILRS web site. Doing so picks up any fixes for typos that had to be done to allow automated parsing programs to use them!

3) Try out the site log viewer at <http://ilrs.gsfc.nasa.gov/SLV2/network/QueryILRSLogs.action> .
